

EFFECTIVE JANUARY 1, 2018 — All Products Made in U.S.A., except where indicated.† Supersedes all previous price lists. All product labeling and instructions printed in English except where indicated.

This catalog reflects standard models of instruments held in stock for quicker order fulfillment. Other models are available by special order. Please call the factory for IRROMETER Models R, S and TG.

IRROMETER® SOIL MOISTURE SENSORS

IRROMETER® measures soil water tension which indicates plant water availability. The white tipped STANDARD is for general use with row, tree and field crops. The blue tipped LOW TENSION is designed for situations where tensions above 30 cb (kPa) are rarely expected, such as in very coarse soils and non-soil container media. Both IRROMETERS have threaded replaceable tips, include a reservoir, air free gauge chamber, and hermetically sealed Vacuum Gauge with ranges of 0-100 cb (kPa) for the STANDARD and 0-40 cb (kPa) for the LOW TENSION.

IMPORTANT NOTICE

Service Unit should be purchased with initial order (see page 2). Only one service unit is necessary to service all of your IRROMETERS.

*AUTOMATIC GAUGE provides direct switching capabilities. To complete catalog number please use:

- *AS w/AC switch closed past setting
 - *AR w/AC switch open past setting
 - *DS w/DC switch closed past setting
 - *DR w/DC switch open past setting
- Refer to product specification sheet for details.

RSU-V REMOTE SENSING UNITS are designed to show soil moisture levels by converting the reading to a voltage signal. Refer to product specification sheet for details.

RSU-C REMOTE SENSING UNITS are designed to show soil moisture levels by converting the reading to a current signal. Refer to product specification sheet for details.

For longer lengths on any IRROMETER (other than MLT)
Add 6.50 per foot (30 cm) — Find Options and Accessories on Page 2

IRROMETER® SERVICE UNITS

A Service Unit is necessary for proper operation of the IRROMETER® instrument and should be included on initial orders. One unit will service ALL of your IRROMETERS.

The Standard Service Unit is used during initial installation and then periodically for removal of air from instrument to ensure maximum sensitivity and accuracy. The Test Pump Service Unit serves the dual purpose of removing air and testing the gauge in one operation.

STANDARD SERVICE UNIT

Catalog #1001.....**56.00**

- Includes:**
- 1 Hand Vacuum Pump
 - 1 Bottle IRROMETER® Fluid
 - 25 Monthly Chart Forms
 - 1 Reference Book.

(Available in Spanish, specify #1001-SP)

TEST PUMP SERVICE UNIT

Catalog #1002.....**85.00**

- Includes:** Same items as #1001, except Hand Vacuum Pump is equipped with test gauge.

MLT SERVICE UNIT (not shown)

Catalog #1007.....**15.00**

- Includes:** Same items as #1001, except Vacuum Pump is syringe style.

IRROMETER® ACCESSORY ITEMS

IRROMETER® SOIL SOLUTION ACCESS TUBES

Call the factory for Soil Solution Access Tubes without suction lines or Series A tubes longer than 72" (180 cm).

SSAT — For easy extraction of soil solution samples when testing salinity levels or plant nutrients in soil water, now with two series to choose from. Both series A and B require a vacuum source. (see options below)

SGL-STOP	Single Hole Stopper.....	10.50 per doz.			
DBL-STOP	Double Hole Stopper	13.00 per doz.			

The **SSAT Vacuum Pump** (CAT. #1002-SSAT) is required to create a sufficient vacuum. Spanish instructions available specify 1002-SSAT-SP.

1002-SSAT SSAT Vacuum Pump **85.50**

The **DS-50CC Extraction Syringe** is used primarily to extract soil solution from SSAT Tube and can also be used to create a partial vacuum on shorter tubes [12 in. (30 cm) or less]. For SSAT Tubes longer than 12in. (30cm), use SSAT Vacuum Pump (1002-SSAT).

DS-50CC† Extraction Syringe **5.50**
